Te Pari recommends safety first

At Te Pari we are very safety conscious. We design and manufacture consumer products with the safety of you, our valued customer, foremost in mind. In addition, we ask that you exercise a degree of care when using any electrical/mechanical appliance and adhere to the following precautions.

Read all instructions before use and save for future reference

- Carefully read all instructions before operating and save for future reference.
- Remove any packaging material and promotional stickers before using the Te Pari Sheep Jetter for the first time.
- Always make sure the Te Pari Sheep Jetter is completely assembled before operating.
- Ensure the Te Pari Sheep Jetter is turned off at the power switch, before removing the battery.
- Always secure the inlet hose onto cam-lock before starting the pump.
- Do not attempt to operate the Te Pari Sheep Jetter by any method other than those described in this booklet.
- Do not pump hot or boiling liquids.
- Do not run the Pump without liquid in the supply tank.
- Always ensure the Te Pari Sheep Jetter is turned off at the power switch and battery disconnected before attempting to move the appliance, when not in use, if left unattended or before disassembling, cleaning or sorting.
- Do not use the Te Pari Sheep Jetter on uneven surfaces.
- Do not leave the Te Pari Sheep Jetter unattended when in use.
- Keep the Te Pari Sheep Jetter clean. Follow the cleaning instructions provided in this book.
- Carefully read all supplied engine/pump instructions to ensure safe operation and avoid possible damage or reduced engine/pump life.
Important safeguards for operating the Te Pari sheep Jetter

- Unwind supply hoses before use.

- Do not let the power cords be submerged in hot or wet surfaces or become knotted.

- The Te Pari Sheep Jetter is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the Te Pari Sheep Jetter by a person responsible for their safety.

- It is recommended to regularly inspect the Te Pari Sheep Jetter. Do not use the Te Pari Sheep Jetter if power supply cord, pump, hoses or Te Pari Sheep Jetter becomes damaged in any way. Return the entire Te Pari Sheep Jetter to the nearest authorized Te Pari Service Centre for examination and/or repair.

- Any maintenance other than specified in this booklet should be performed at an authorized Te Pari Service Centre.

- Do not use the Te Pari Sheep Jetter for anything other than its intended use.
Sheep Jetter

Instructions on how to operate your Te Pari Sheep Jetter

Setting up your Te Pari Sheep Jetter

1. Fully Charge the 12VDC battery before use.
2. Place Jetter on a firm and level surface in an appropriate location that will allow your animals to travel freely into the Jetter.
3. Line up gates/race to the inlet and outlet of the Jetter.
4. Making sure the Jetter is turned off, connect the battery (12VDC) to the control unit.
5. Connect the outlet of the pump to the hose tail on the Jetter. Connect the inlet of the pump to the tank outlet and prime the pump if required (Refer the user manual for the pump you’re using). Make sure all connections are securely connected.
6. Open any valves between the storage tank and Jetter and start your pump.
7. Switch the “Power” switch to “on” and “Nozzle Selection” switch to “both” on the control box attached to the Jetter.
8. Prime the Jetter by pushing the “Manual Spray” button on the control box. Keep priming the system until all air bubbles have been removed from the system and the pump has built up pressure.
9. If desired switch the “Nozzle Selection” switch to either “top” or “btm” if required.
10. Using the “manual Spray” button adjust the flow/pressure of your pump until your get the desired output flow & pressure.

Running the Jetter

1. Depending on your set up open any gates etc. and allow your animals to enter the Jetter in single file.
2. We recommend running the motor at around ¾ throttle to get between 60 – 90 psi.
3. The sensors in the Jetter will pick up when an animal enters and opens the selected valves to apply spray to the required area.

Packing up your Te Pari Sheep Jetter

1. Flush the Jetter with clean water.
2. Turn your pump off.
3. Push the “Manual Spray” button to release any pressure in the spray lines.
4. Turn the “Power” switch to “off”.
5. Close and valves on the tank and disconnect the hoses from the Jetter.
6. Wash down and dry the Jetter to clean off the overspray.
7. Pack up the Jetter and store in a dry place.
Sheep Jetter

Care, cleaning and storage

To keep your Te Pari Sheep Jetter working efficiently proper care, cleaning and storage need to be maintained.

Care
Before each use inspect all parts of the Jetter to check for any damage has occurred. Move and lift the Jetter using the correct lifting points and handles. Following all instruction outlined in this booklet.

Cleaning
After each use of the Jetter flush all the line with clean water to remove any spray that could cause damage to the pipe work if left for an extended amount of time. Wash down the Jetter to remove any overspray of chemicals, dirt and grime that has built up during use and transport. Check nozzles for build-up of grime and clean accordingly.

Storage
Disconnect the battery from the Jetter before storing and switch the unit off. Drain as much liquid from the unit as possible and fully dry the Jetter and Store Jetter in a clean, dry area that is not subject to the elements.

<tr>
<th>QUESTION</th>
<th>ANSWER</th>
</tr>
</thead>
<tbody>
<tr>
<td>The nozzles are not spraying evenly or the top nozzles are dripping a significant amount between animal.</td>
<td>Check that the Jetter is on a level surface and the valves are deactivating.</td>
</tr>
<tr>
<td>Check that the Jetter is on a level surface and the valves are deactivating.</td>
<td>Check the pump is correctly primed, no air bubbles are in the spray lines and nothing is restricting flow from the tank.</td>
</tr>
<tr>
<td>The Jetter does not stop spraying even without an animal in the Jetter.</td>
<td>Turn the “Power” switch “off” then back “on”. If this does not fix the issue check nothing if between the two sensors on each side of the Jetter.</td>
</tr>
</tbody>
</table>

Follow steps below:

- Remove the 4 x bolts off the valve.
- Open the valve up

There are two holes on the face plate that need checking as well

To Clean: Push fuse wire through Spray water into hole

The blockage will be in either of these two little holes
